

Manuel Cheta - Senior Frontend Developer

Personal Overview

I've felt a connection with computers since I first played Prince of Persia, in 1996. Working in frontend dev jobs gives me satisfaction because I like being close to the user.

As a matter of habit, I'm always revisiting my fundamentals in HTML, CSS, JS, especially since I've got my Web Accessibility Specialist accreditation. I like going into the finer details of user interactions, developer expectations, and HTML specs.

Throughout my career I've worked as an IT technician, webmaster, WordPress theme editor, partner in a small ecommerce store, ecommerce tech support, and frontend developer.

In my spare time I read Sci-Fi and science books, work on my two podcasts, about Life in the UK and tech news, and play videos games.

Professional Experience:

Employer: Matchesfashion | London, UK | <https://www.matchesfashion.com>
